

USER MANUAL

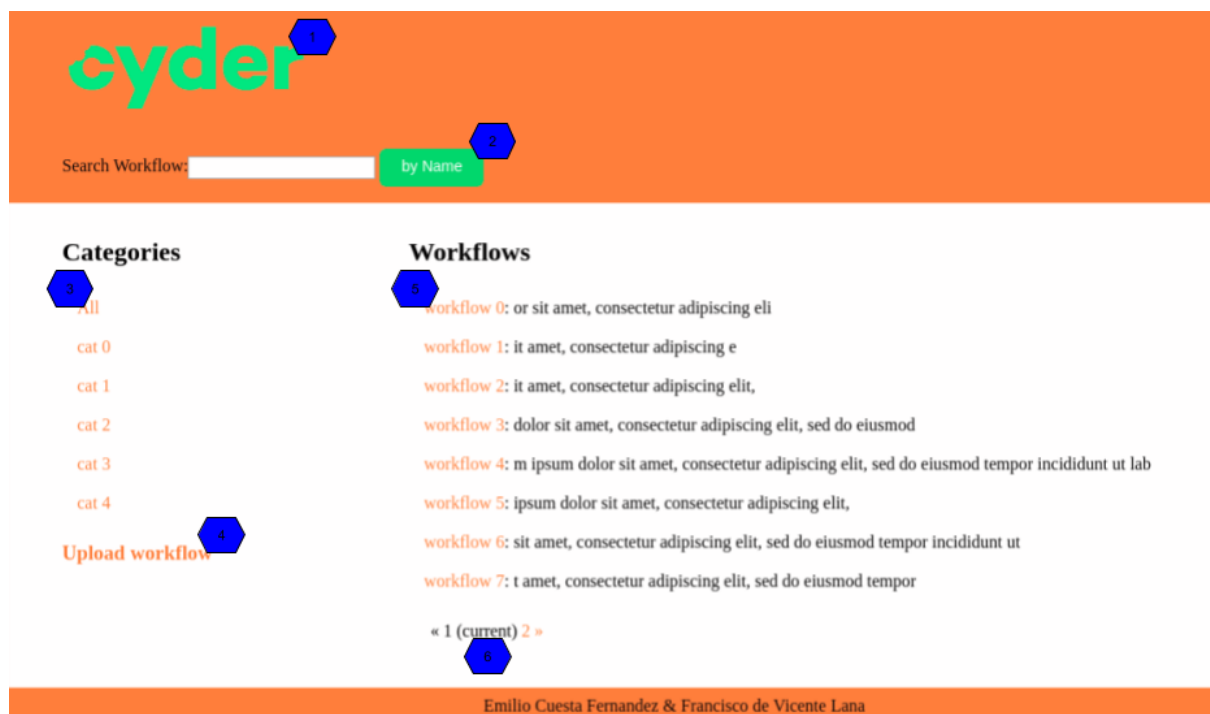

PSI - ASSIGNMENT 4

Introduction.-

In this guide we will explain how to use and navigate in our web page project. In the following sections there are instructions on how each of the main pages works with some screenshots as an example. In general, you can find a header at the top with our project's logo (where you can click in order to go to the main page); whereas in the bottom there is a footer with just our names. As you can see we use a combination of orange and green colors that in our opinion do a great job together. All text links are displayed in **orange** and when you hover over them they get **underlined**. On the other side, all buttons on the web are green curved rectangles so you can find them really quickly. In the next section we describe the page that appears when you start the application, the index page.

Index.-

Here we can find a list of the different categories in which workflows are classified and another list showing workflows which depends of the selected category.

1. **Logo:** it's a common feature of all pages and clicking on it gives you the ability to return to the main page.

2. **Search bar:** this subheader allows you to enter the name of any workflow you want to find. When there is a coincidence, the details of that workflow will be showed; and if the name does not match a message will be displayed informing you along with a button to go back.
3. **Category list:** on the left side you can see a list of the categories available. You can click on any of them to get a list of the workflows related to it or just select All (by default) in order to see them all.
4. **Upload option:** clicking here the workflow upload form will be displayed.
5. **Workflow list:** here are shown all the selected workflows existing along with a brief description of them. By making click on the name you can see the detail page of each one.
6. **Pagination:** as you can see, pagination has been implemented and you can navigate through the pages in a intuitive manner. If the number of selected workflows is not enough this will disappear.

Workflow details.-

This page will be shown each time you want to see the detail of any workflow available. The top area in orange is the same as the index.

1. **Diagram:** this is a graphical representation of the workflow generated from a json file. You can play with it by scrolling, zooming and moving elements in the bordered area.
2. **Workflow name:** just that.
3. **Categories:** list of categories related to the workflow (separated by commas).
4. **Captcha:** Google captcha to ensure that you are not a robot.
5. **Download button:** when the captcha is properly activated, it will download the json file to your computer.

Upload.-

This form will be displayed to upload a new workflow.

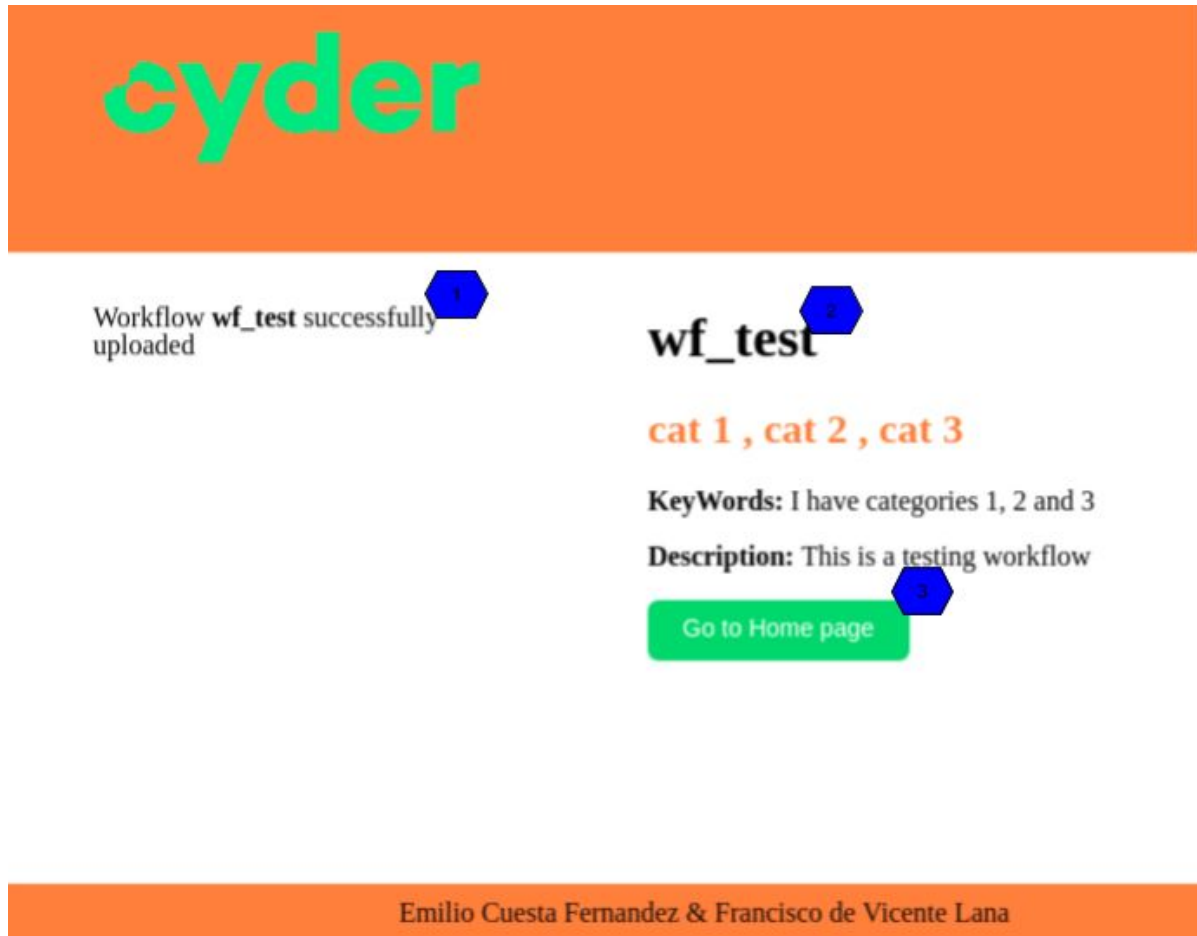

The image shows a web form for uploading a new workflow. The form is titled 'cyder' in a large, stylized font. Below the title, there are several input fields and a submit button, each marked with a blue hexagonal icon and a number from 1 to 7. The fields are: 'Name:' (1), 'Category:' (2), 'Keywords:' (3), 'Description:' (4), 'VersionInit:' (5), 'Workflow File:' (6), and a green 'CreateWorkflow' button (7). The 'Workflow File' field has a button labeled 'Seleccionar archivo' and a text label 'Ningún archivo seleccionado'.

Emilio Cuesta Fernandez & Francisco de Vicente Lana

1. **Name:** the name of the new workflow.
2. **Category:** a set of categories where the workflow belongs (click more than one with the control key).
3. **Keywords:** some text as keywords.
4. **Description:** a fairly long description of the workflow.
5. **Version:** its version identifier
6. **Json file:** clicking on it will prompt a file selector in your operating system.
7. **Submission:** submit button which will create the new workflow if each field is properly filled. In this case, the success page will be displayed.

Success.-

This page give the user feedback about any newly created workflow.

1. **Message:** explaining feedback.
2. **Workflow field:** some fields of the new workflow, showed like in the details page.
3. **Main page Button:** click it to go back to the index page.
